PROFILE

Software Engineer specializing in building AI-powered, high-performance, and scalable web applications. Work spans the full development lifecycle — from designing responsive, SEO-oriented frontends to architecting robust backend systems and automating complex workflows with artificial intelligence.

On the frontend, develops modern, responsive interfaces using Next.js, React.js, React Native, Vue.js, TypeScript, and Tailwind CSS — translating UI/UX designs into fast, cross-browser-compatible user experiences. On the backend, builds server-side functionality using Laravel, Node.js, and Express, integrates RESTful APIs, and manages relational databases with MySQL.

Actively integrates large language models and Claude AI agents into production workflows to automate tasks, enhance application capabilities, and accelerate development cycles.

WORK EXPERIENCE

Software Engineer · Azerbaijan University of Languages <i>AI Research Center</i>	<i>May 2026 – Present</i>
- Developing AI-powered applications and tools within an academic research environment. - Fine-tuning and integrating AI/ML models into production-ready web applications. - Building full-stack solutions using React Native, Next.js, TypeScript, Laravel, Node.js, and Express. - Designing and implementing modern, responsive interfaces with Tailwind CSS. - Integrating large language models and AI agents into real-world projects and workflows. - Collaborating on research-driven software development at the intersection of academia and applied AI.	
Frontend Developer · Safaroff Agency	<i>Oct 2025 – May 2026</i>
- Designed and developed pixel-perfect, accessible UIs based on Figma / Adobe XD prototypes. - Built reusable component libraries in React.js and Vue.js, reducing development time across projects. - Collaborated with backend engineers to integrate RESTful APIs and ensure seamless data flow. - Enforced cross-browser compatibility and achieved Lighthouse performance scores of 90+. - Wrote unit and integration tests; identified and resolved bugs in both new and legacy code. - Actively integrated Claude AI agents into projects to automate workflows and enhance application capabilities.	
Full-Stack Developer · Proton MMC	<i>Oct 2022 – Jun 2024</i>
- Delivered full-stack web projects using Laravel (backend) and Next.js (frontend) with SSR / SSG / ISR. - Built internal admin panels for CMS and user-management workflows. - Integrated REST APIs and managed smooth data exchange between frontend and backend layers. - Configured servers, managed hosting environments, and handled domain setup and DNS. - Optimized page load times, reducing average LCP by ~35% through code-splitting and image optimization.	

SKILLS

Frontend	HTML5, CSS3, SCSS, JavaScript (ES6+), TypeScript
Frameworks	React.js, Next.js (SSR/SSG/ISR), Vue.js, Angular, React Native
State & UI	Redux, Zustand, Axios, Formik, Tailwind CSS, Bootstrap, Styled Components
Backend	PHP, Laravel, Node.js, Express, REST API, MySQL
AI & DevTools	Claude AI, GitHub Copilot, Cursor, Git, Figma, Postman, Adobe XD
SEO & UX	On-Page SEO, Technical SEO, Google Analytics, Responsive Design
Soft Skills	Problem-solving, Communication, Teamwork, Time Management, Adaptability

PROJECTS

AUL AI Advisor · **Azerbaijan University of Languages** · *Academic*

A React Native mobile application developed for Azerbaijan University of Languages students. Features secure authentication (login/register) and an AI-powered advisor that answers questions about faculties, departments, and university life. AI integration built with Ollama; backend developed with Node.js and Express by a separate developer — responsible for full API integration on the mobile side.

Stack: *React Native, TypeScript, Ollama AI, Node.js REST API*

Safaroff Agency Portfolio — safaroff.com · *Commercial*

Corporate portfolio website showcasing company profile and client projects. Integrated an AI-powered chatbot supporting both text and voice communication with users.

Stack: *PHP / Laravel, HTML, SCSS, JavaScript, AI Chatbot Integration*

PDP — Personal Data Protection Azerbaijan · *Government · Confidential*

Large-scale government corporate website featuring multi-step forms and interactive quizzes for data protection compliance. Integrated MyGov authentication system for secure citizen login.

Stack: *PHP / Laravel, HTML, SCSS, JavaScript, MyGov Integration*

Ekspertiza Mərkəzi — Internal CRM System · *Government · Confidential*

Full-featured internal CRM platform serving both citizens and government financial staff. Citizens log in via MyGov to view personal data, submit applications, track payments, and digitally sign contracts.

Stack: *Next.js, TypeScript, Tailwind CSS, Laravel REST API, MyGov Integration*

LiveMentors — livementors.org · *Charity — Full-Stack Solo*

Multilingual corporate website for a charitable conference platform. Developed entirely as a full-stack solo project. Supports three languages (AZ / EN / RU) with custom i18n routing.

Stack: *Next.js, TypeScript, Laravel, REST API, i18n*
